PROFESSIONAL SUMMARY

Aspiring Data Analyst and Power BI Developer with a Diploma in Computer Science and a strong focus on data analysis, business intelligence, dashboard development, SQL, DAX and data visualization. Interested in transforming raw data into clear, actionable insights through clean reporting and interactive dashboards.

CORE SKILLS

Data Analytics	Data Cleaning, Data Analysis, KPI Reporting, Business Insights
BI & Visualization	Power BI, Dashboard Design, Data Visualization, Power Query
Data & Query	SQL, DAX, Data Modeling
Tools & Programming	Microsoft Excel, Python, Pandas, Git/GitHub

PROJECTS

Sales Performance Dashboard — Power BI

- Built a portfolio/demo dashboard concept for sales KPIs, trends, category performance and business-focused reporting.

Customer Analytics Dashboard — Power BI / SQL

- Designed an analytics workflow concept covering customer segmentation, trends, KPIs and actionable business insights.

E-commerce Business Analysis — SQL / Excel

- Created a portfolio analysis concept using data cleaning, exploratory analysis and business metrics to support decision-making.

EDUCATION

Diploma in Computer Science

Completed Diploma | Computer Science

PROFESSIONAL DEVELOPMENT

- Building practical skills in Power BI, SQL, DAX, Excel and data visualization.
- Developing portfolio projects focused on dashboards, analytics and business intelligence.
- Learning data modeling, Power Query and professional dashboard design.

CAREER OBJECTIVE

Seeking an entry-level opportunity in Data Analytics, Business Intelligence or Power BI development where I can apply analytical thinking, technical skills and a continuous-learning mindset to real business problems.
